Education

Bachelor of Engineering/ Computer Science Engineering, KCG College of Technology	11/2021 – 05/2025 Chennai, India
John Bosco Matric Higher Secondary School Completed 12th Board Exam with 83% marks	Kovilpatti, India

Professional Experience

Visualisation Developer, KBR - Designed and developed AR/VR applications and immersive 3D visualization experiences for buildings and plants using Unreal Engine, Blender, and 3ds Max. - Created realistic 3D models, animations, and interactive environments to support project planning, design reviews, and client presentations. - Integrated VR/AR hardware and optimized experiences for smooth performance and user engagement. - Collaborated with cross-functional teams to translate technical designs into immersive training and visualization solutions. - Conducted testing, debugging, and iteration to ensure high-quality visualizations and seamless user interactions in AR/VR platforms.	04/2025 – 12/2025 Chennai, India
VR Developer, Nokia - Developed immersive 3D training environments for Nokia’s Standard Operating Procedures, enhancing employee training through interactive VR modules. - Designed and optimized virtual reality applications using Unity, Blender, and C#, boosting user engagement and knowledge retention. - Collaborated with instructional designers and subject matter experts to visualize SOP workflows in 3D, ensuring effective training experiences. - Led integration of user-friendly interfaces, realistic simulations, and performance analytics into VR tools, increasing training efficiency. - Conducted testing and debugging to ensure smooth performance across VR hardware platforms while providing technical support. - Documented project specifications and outcomes to facilitate cross-team collaboration and future upgrades.	06/2023 – 12/2023 Chennai, India

Skills

3D Modelling

- Proficient in creating models using Blender, 3ds Max, and Unreal Engine

Animation

Proficient in creating 3D animations using Blender, Unreal Engine, and Unity

AR/VR/MR Development

I specialize in developing immersive AR/VR/MR applications for training, defense, and education using Unity, Unreal Engine, and Blender.

Game Design

Engine Proficiency: Experienced in designing and prototyping immersive gameplay experiences using **Unity, Unreal Engine, and Godot.**

Projects

VR Defense App, *Built a real-time VR environment for defense training, enabling immersive firearm handling practice integrated with automation.*

2023

- Built a real-time VR environment for defense training applications.
- Enabled immersive firearm handling practice simulations.
- Integrated automation for enhanced real-world interaction and feedback.
- Designed to improve training effectiveness and safety in defense scenarios.

VR Dress Simulation,

2022

Built a VR dress simulation prototype using Unity and Marvelous Designer.

- Developed a VR dress simulation prototype using Unity and Marvelous Designer during a hackathon.
- Implemented realistic fabric behavior and immersive interaction to showcase virtual garment fitting.
- Gained hands-on experience in VR development and 3D apparel visualization through collaborative prototyping.

VR Smart Education, *Developed an interactive VR application for K12 PCM education, creating immersive lessons to enhance student engagement and understanding.*

2024

- Developed a smart education VR application focused on K12 PCM (Physics, Chemistry, Math) subjects.
- Created interactive lessons to enhance student engagement and understanding using immersive VR environments.
- Designed educational content that supports experiential learning and visualization of complex concepts.
- Collaborated within a team to deliver a functional prototype for academic evaluation.

Courses

This is Animation, *Sony Pictures Animation*

2025

- Hosted by acclaimed director Kris Pearn, providing an insider's view of the animation production pipeline.
- Gained hands-on knowledge of key animation concepts including character development, world-building, and the 12 Principles of Animation.
- Explored the business and collaborative aspects of the animation industry.
- Engaged in interactive exercises to design rudimentary animated characters and apply animation techniques.
- Developed a comprehensive understanding of the animation storytelling process, from idea creation to final production.
